

Casper Leerink

Vancouver, BC V5K 2S2
casperleerink@gmail.com
6048389941

Hi, thank you for reading my resume!

My name is Casper, I grew up in the Netherlands where I finished my bachelors degree. For my masters degree I moved to Vancouver, where I am currently living.

My interests are a cross-section between art, technology and education. Over the years I have gained experience in all three directions. I have developed my artistic side finishing a bachelors degree in classical piano performance as well as a masters in Interdisciplinary Studies.

During this time, because of my interest in electronic music, I gained experience in programming for both music software, micro controllers as well as websites. I became proficient with these technologies, mostly by practising them in my own projects as well as with the help of online tutorials and courses. As a Digital Media Facilitator at the maker space of Simon Fraser University, I gained experience with helping students with these and various other technological challenges.

In addition I have enjoyed creating a variety of websites for artists and art projects. You can see a selection at casperleerink.com/code

Work Experience

Freelance Web Developer

Casper Leerink - Web Design and Development - Vancouver, BC
September 2018 to Present

As an independent web developer, I created portfolio websites for artists as well as web apps for art projects such as a custom map or an interactive canvas application.
